Professional Summary

Computer Science graduate with hands-on experience developing software applications through academic projects and internship experience. Skilled in Python, Java, SQL, AI-based applications, REST APIs, and database-driven systems. Passionate about software development, problem solving, and continuously learning modern technologies while building scalable and practical solutions.

Professional Experience

Genesis Training Dec 2025 – June 2026
Java Stack Intern

- Developed backend modules using Java, Spring Boot, MySQL, and REST APIs following layered architecture principles.
- Built CRUD functionalities, integrated relational databases, and implemented request validation and exception handling.
- Tested REST APIs using Postman while managing project versions through Git and GitHub.
- Worked on full-stack development concepts including authentication workflows and database integration.

Projects

PhytoDetect AI — Grape Disease Detection System

- Developed a CNN-based image classification model trained on 4,000+ grape leaf images to identify 7 different grape diseases with an accuracy of 93%.
- Built a Flask-based web application allowing users to upload grape leaf images and receive real-time disease predictions.
- Integrated the trained AI model with backend services to automate disease diagnosis and improve accessibility for farmers.

Customer Order & Inventory Management System

- Developed a full-stack application using React.js, Spring Boot, and REST APIs to manage customers, products, and orders.
- Implemented stock validation, automatic order total calculation, inventory updates, and low-stock tracking.
- Integrated MySQL using Spring Data JPA and Hibernate with input validation and global exception handling.

Placement Automation Tool (PAT)

- Developed a placement management platform supporting Student, Employer, and Admin roles through secure authentication and REST APIs.
- Implemented modules for job postings, eligibility verification, resume management, notifications, and recruitment tracking.
- Integrated frontend and backend components using React.js, Spring Boot, and MySQL to streamline placement activities.

Education

Visvesvaraya Technological University 2022 – 2026
Bachelor of Engineering in Computer Science and Engineering Bengaluru, Karnataka
CGPA: 7.6

Achievements & Certifications

- NPTEL Elite Certification – Artificial Intelligence in Industrial and Management Engineering
- Genesis Industry Ready Internship Program – Java Stack
- IBM SkillsBuild – Data Analytics Fundamentals
- Research Paper Published in Springer Proceedings – International Conference

Technical Skills

Programming	Python, Java, C
Frameworks	Spring Boot, Flask, React.js, REST APIs
AI / ML	TensorFlow, Keras
Databases	MySQL, PostgreSQL
Tools	Git, GitHub, Maven, Postman, VS Code
